# Muhammad Ghazali Nur Rahman

Full Stack Developer | Surabaya, Indonesia | mghazalinurrahman939@gmail.com
linkedin.com/in/ghazali10 | github.com/Xdzall | portofolio.mghazali.my.id

## PROFESSIONAL SUMMARY

Informatics Engineering graduate from PENS with experience building manufacturing systems, client websites, and an operating NFC business. Full stack work across ASP.NET, Blazor, Next.js, Strapi, Vue, Express, WordPress, PostgreSQL, SQL Server, Docker, Linux, and IIS.

## PROFESSIONAL EXPERIENCE

**PT Panasonic Manufacturing Indonesia | Full Stack Developer Intern, Warehouse Control | 2026 - Present**

• Delivered warehouse and vendor control workflows for stock visibility, material requests, shipments, partial receiving, ERP integration, and reporting; installed on the company IIS server for UAT.

• Built a .NET 10 ASP.NET Core API, Blazor web application, and in-process background worker on SQL Server with EF Core, local JWT accounts, SignalR, xUnit, and bUnit.

**TapInAja | Co-Founder & Full Stack Developer | Ongoing**

• Co-founded a four-person operating NFC tag business that directs customers to business Google Review pages.

• Built storefront, administration, dynamic redirect, and tap analytics workflows with Vue 3, Express.js, PostgreSQL, Docker, and Nginx.

**Freelance Web Developer | WordPress & Full Stack | Ongoing**

• Built custom WordPress sites for UI-affiliated clients: RKD, Vokasi Bisa, Klinik Digital, Jejak Baik, and ARA.

• Developed Merdeka Sejahtera company profile with Next.js, TypeScript, Strapi CMS, PostgreSQL, and Docker.

**PT Panasonic Manufacturing Indonesia | Full Stack Developer Intern, Production Systems | Jul 2025 - Feb 2026**

• Developed production monitoring and material control applications with C#, ASP.NET MVC, SQL Server, Bootstrap, and IIS.

• Implemented automated production reports and improved dashboard logic to show the latest Target Unit data.

## SELECTED PROJECTS

**AutoChef | Backend Developer | 2025 - 2026**

Ingredient-based recipe recommendations using TF-IDF and cosine similarity; PHP, PostgreSQL, Docker, Ubuntu. github.com/Xdzall/BackendAutoChef

**Panasonic Warehouse Control | Full Stack Developer | In UAT**

Modular warehouse and vendor system with ASP.NET Core API, Blazor, .NET worker, SQL Server, SignalR, and automated tests, deployed on IIS.
